EDUCATION

University of Waterloo

Bachelor of Computer Science (Honours with Co-op) — GPA: 3.9/4.0

Waterloo, ON

Expected 2030

PROJECTS

UW Sleeper | *Java, Spring Boot, Hibernate, PostgreSQL, REST APIs, React, TypeScript, Railway* Dec 2025

- Architected **REST API** using **Spring Boot** and **Hibernate** with **PostgreSQL** database, implementing CRUD operations, custom query methods and CORS configuration
- Built responsive **React** frontend with **TypeScript** featuring voting system with state persistence and Claude powered semantic search, allowing UW students to discover the campus's best sleeping spots
- Handled **end-to-end** production of the web application, including backend deployment on **Railway**

Coco the Co-op Coordinator | *JavaScript, HTML, TailwindCSS* Dec 2025

- Built Chrome Extension with **AI-powered autofill** that extracts job data via content scripts, eliminating manual form entry for job applications
- Architected message-passing system coordinating **content scripts, service workers, and side panel UI** while maintaining secure API handling through Chrome Storage
- Integrated **PDF.js** for client-side resume parsing and **Claude API** to identify skill gaps based on saved job requirements

First Loved Bible | *Python, Streamlit, Supabase, Docker, Render* Nov 2025

- Developed a **Python web application** using **Streamlit** that enables seamless Bible passage searching across 4 translations, reducing friction in daily scripture study with an **intuitive search interface** and integrated commentary links
- Implemented **user authentication** and **data persistence** with **Supabase**, enabling users to bookmark passages and save personal study notes across sessions
- Integrated Claude AI via **Anthropic API** to provide context-aware biblical definitions and insights, automatically grounding responses in the user's currently viewed scripture passage

ClearPharma | *JavaScript, HTML/CSS, Firebase* Nov 2025

- Developed **healthcare web application** at UW Technology in Pharmacy hackathon for pharmacist-patient communication, implementing **real-time symptom logging** and consultation request system
- Built **dual-dashboard interface** with patient medication tracking and pharmacist monitoring portal with **data synchronization**
- Implemented **Firebase authentication** and **role-based access control** distinguishing patient and pharmacist user permissions

EXPERIENCE

Founder November 2024 – June 2025

Halifax Code Circle & Halifax Language Exchange

Halifax, NS

- Established **student-led** non-profit STEM education and language learning programs, scaling to **100+** active participants and amassing **130k+** social media impressions
- Spearheaded local student opportunities through leading weekly in-person sessions, instructing two **executive teams**, managing **web development** and consistent **brand design**
- Built **volunteer infrastructure** from ground up to launch both organizations, developing club websites using HTML, CSS, Javascript and **Bootstrap** framework

TECHNICAL SKILLS

Languages: Javascript, Java, Python, HTML/CSS, Typescript, Racket

Frameworks/Libraries: Bootstrap, React, Next.js, TailwindCSS, Streamlit, Spring Boot, Hibernate, PostgreSQL

Tools/Platforms: Cloudflare, Git, VS Code, IntelliJ, Vercel, Firebase, Supabase, Docker, Render, Railway
